

Partners#

The OASIS project brings together a number of strategic partners: the Archaeology Data Service, Historic England, Historic Environment Scotland and the Royal Commission on the Ancient and Historical Monuments of Wales under the umbrella of the University of York.

Archaeology Data Service	The Archaeology Data Service supports research, learning and teaching with freely available, high quality and dependable digital resources. It does this by preserving digital data in the long term, and by promoting and disseminating a broad range of data in archaeology. The ADS promotes good practice in the use of digital data in archaeology, it provides technical advice to the research community, and supports the deployment of digital technologies.
Historic England	Historic England is the Government's statutory adviser on the historic environment. Officially known as the Historic Buildings and Monuments Commission for England, we are an executive Non-Departmental Public Body sponsored by the Department for Culture, Media and Sport.
Historic Environment Scotland	Historic Environment Scotland is the lead public body set up to investigate, care for and promote Scotland's historic environment.
RCAMHW	The Royal Commission is the investigation body and national archive for the historic environment of Wales. It has the lead role in ensuring that Wales's archaeological, built and maritime heritage is authoritatively recorded, and seeks to promote the understanding and appreciation of this heritage nationally and internationally.
ALGAO	The Association of Local Government Archaeological Officers (ALGAO) was originally formed in 1996 (through merger of the Association of County Archaeological Officers and Council of District Archaeological Officers) to represent all archaeologists working for local authorities and national parks.

The OASIS Project is or has been also supported by the following organisations:

University of York	Founded on principles of excellence, equality and opportunity for all, the University of York opened in 1963 with just 230 students. In less than 50 years we have become one of the world's leading universities. York has become one of the top ten universities in the UK for teaching and research and is first in the UK and seventh in the world in
------------------------------------	---

	the Times Higher Education world rankings of universities less than 50 years old.
Council for British Archaeology	The Council for British Archaeology is an educational charity working throughout the UK to involve people in archaeology and to promote the appreciation and care of the historic environment for the benefit of present and future generations.
Society for Museum Archaeology	The SMA promotes museum involvement in all aspects of archaeology and emphasise the unique contribution of museums to the essential unity of the archaeological profession; promotes greater public understanding of the archaeological past and a fuller public appreciation of the importance of archaeology and campaigns for the acceptance of museums as guardians of a vital part of the nation's heritage and as the appropriate location for the storage and interpretation of all archaeological material.
The Archaeological Investigations Project	English Heritage commissioned The Archaeological Investigations Project to undertake a detailed study of the nature and extent of archaeological fieldwork carried out in England annually. The purpose of the project was to chronicle archaeological investigative work in both the planning and development control sector, and work undertaken purely within a research context. The AIP project was came to an end in 2013.
The Research Support Libraries Programme	The Research Support Libraries Programme (RSLP) was a national initiative, funded by the four higher education funding bodies. It brought together both traditional and new forms of access to library information, with specific reference to support for research. It started in the academic year 1999-2000 and finished on 31 July 2002, with funding totalling almost £30m awarded during the lifetime of the Programme.
